

# Granola: the invisible AI assistant for every meeting, everywhere

No bot joins your call. No recording banner. Granola listens on your own device, turns your rough notes into clean summaries, and works in real time to keep you sharp mid-conversation.

## BEFORE THE CALL

Granola pulls your calendar and preps a brief before every external meeting: who's attending, what was said last time, what's changed since. No scrambling through old notes.

## DURING THE CALL

Stay present instead of typing. Granola turns the conversation into clean, structured notes on its own — so nothing a prospect says gets missed or forgotten.

## AFTER THE CALL

Notes, action items and follow-ups are ready the second the call ends — synced straight into HubSpot, Salesforce, or Attio. No admin, no chasing reps for updates.

## FOR THE TEAM

When a deal moves from sales to CS, full call history goes with it. Nothing gets re-explained, nothing gets lost between handoffs.

## Why it's worth trying on your next call

It's free (and no credit card required) for a full month to try out with every call and meeting you have. After that, if you want to keep it, it's only \$14/user/month for unlimited notes, cross-meeting search, and CRM sync. Free to start. Already used by leading teams. It coaches you and makes you better, privately.

## Activate your free month — 3 steps

- 1 Click the link below on a **desktop** computer (Mac or Windows) to unlock desktop and mobile access.
- 2 Sign up with your **work email**, not a personal address.
- 3 Run **one real meeting** in Granola. That's it — free month unlocked.

## TRY GRANOLA

[operatorstack.co/go/granola](https://operatorstack.co/go/granola)

Know someone on your team who'd get value from this? Feel free to forward this along — the link above works for anyone.
